Whitney Wanjira

UI/UX Designer

The movement of aircraft around the center of gravity is fascinating. Wanjira has always been curious about how autopilot works with her curiosity having her dig deeper and understand how it works. The power of technology to solve simple problems such as long-distance travel has made her believe that there is more she can do. Can we teleport? What else can tech get us to do? As a software developer, she is on a journey to explore how automation works and what more could be done.

EDUCATION

AkiraChix
codeHive - Diploma in Information Technology

02/2022 - Present

Relevant Courses:

- **UI/UX Design:** Logo Design, Colour Psychology, Wireframing and prototyping

- **Front-end Web Development** Manipulating DOM and API's

- **Front-end Mobile Development:** UI blocking, Working with collections eg. lists, adapter & array adapters.

- **UX Research:** UX research methods: quant & qual, Designing with data: Focus on common quant research methods

- **Backend Development:** Using SQLite for local development, Django Url routing modules

SKILLS

- Able to build high-fidelity and low-fidelity frameworks using Figma

- Intermediate experience in Adobe suite i.e Adobe Illustrator and Adobe Photoshop.

- Knowledge in ideating, defining problems, prototyping, and testing in UX research.

- Great understanding of version control systems such as git.

- Knowledge of Object-Oriented Programming in Python e.g inheritance

- Understanding of OOP in Kotlin

- Basic knowledge of DOM manipulation in Javascript.

PERSONAL PROJECTS

My Portfolio
- https://enchanting-semifreddo-9b78be.netlify.app/

Cheche
- Report documentation on the inadequacy of science lab equipment in secondary schools in Kenya. https://drive.google.com/drive/folders/1sqeX5fQvAmvgywLAhAQ9mlswPJSOxlm6?usp=sharing

Bami Salon
- High-fidelity frameworks for a salon https://www.figma.com/file/bueFzpNk9PdMDrGHU0rppg/Untitled?node-id=0%3A1 A system that processes deposits and withdrawals using Python https://github.com/wanjira-whitney/OPP.git

Banking System
- A system that processes deposits and withdrawals using Python https://github.com/wanjira-whitney/OPP.git

Workout log
- An app that tracks down workouts using Kotlin. https://github.com/wanjira-whitney/Workout-Log.git
